

September 2012

Joseph Acaba is in orbit.

Our own Joseph Acaba (RPCV Dominican Republic) is currently operating the robot arm on the International Space Station and participating in delicate repairs to the electrical system. He is due to return end of next week. This is new meaning to "Bringing the World Home".

Good luck, Joe. We all wish you a safe return.

Never know where we will end up!

See the NASA blog [here](#).
